

Python Trainee – Phase 2 Evaluation – ajay joshi

Status: Submitted

Due: 22 April 2026

Submitted: 29 April 2026 07:21 UTC

Assessors Nisarg Raval

Assessee ajay joshi

Final Score: 75.6% | Pass

Section	Weight	Score
Technical Evaluation	60.0%	44.4%
Non-Technical Evaluation	40.0%	31.2%

Technical Evaluation (weight: 60.00%)

Core Technical Competence *

Rating: 7 / 10.00

Comment: Knows the concepts he has worked on but is not pro-active to explore other in-depth details. He knows what he is doing though and is able to explain it clearly. The approach, the concept, etc. At least someone who knows the concepts and has understood it properly.

Problem Solving & Debugging Ability *

Rating: 8 / 10.00

Comment: Has the capability and did well. Asked to implement a rate-limiter problem statement on paper and he was able to do it and also explained the approach clearly.

Practical Application Skills *

Rating: 8 / 10.00

Comment: Knows the concepts he has worked on so can answer and utilise that accordingly. The rate-limiter was a dependency based concept which he explained clearly and how this concept helps achieve what we want.

Code Quality Awareness *

Rating: 7 / 10.00

Comment: Need to improve more on naming conventions and readability stuff. Overall logic implementation was correct but readability can be improved.

Learning Velocity *

Rating: 7 / 10.00

Comment: I would say he is not so pro-active. He needs to not just understand a given concept from one source which was provided by the mentor. He needs to dive more into it and explore more. Was able to take technical discussions in-depth with him and he also asked counter questions which is good. If pushed, we can groom and train him more better as he has the capability.

Non-Technical Evaluation (weight: 40.00%)

Ownership & Accountability *

Rating: 8 / 10.00

Comment: He was good at absorbing the counter questions and did not bluff on any answer. Was able to argue when he was right and also take feedback when wrong.

Communication Clarity *

Rating: 8 / 10.00

Comment: Knows what he is saying and has clarity about what he has learnt. So was able to clearly communicate his thought process even when the question was tweaked. No random answers or bluff I would say.

Collaboration & Feedback Handling *

Rating: 8 / 10.00

Comment: Was open to take feedback and also counter my questions when he felt I might be wrong. Was calm and compose throughout the interview.

Professional Discipline *

Rating: 8 / 10.00

Comment: As above, he was calm and compose throughout and was someone who knew what he was talking about and what the interviewer asked.

Role Readiness / Employability Signal *

Rating: 7 / 10.00

Comment: Need to push him to be pro-active and learn things in-depth. but has conceptual understanding and with a little more grooming, he should be able to take on the role.

Overall Notes

Strength: Communication wise he is good. Logically strong as well. Knows his stuff and is able to convey his thought process clearly. Improvement Areas: Need to push him to be pro-active and learn things in-depth. but has conceptual understanding.
